Koltrast 2

Kungsfågel 1

Totalt 11 individer av 6 arter.

Ringmärkare: VIV, ALD, JSA, FOG, JMS, TSR, SSL, JWM, MHM, TLN, AOI.

DIVERSE:

STTG: Very few birds today, as poor weather conditions for migration persisted.

Div: Cleaning and shopping day! ALD and FOG went to Kalmar to do grocery shopping and the rest of us cleaned the station. JMS and VIV also had a introduction to moult presentation.

Later in the evening the cormorant team arrived. This time they only caught and ringed one cormorant and decided not to satellite tag it as it was a 2nd calendar year. We wish them better luck next time around!
