Talgoxe 2

Stare 1

Bofink 1

Totalt 29 individer av 10 arter.

Ringmärkare: TSR, FOG, MSL, ALD, VIV, JSA, JMS, MHM.

DIVERSE:

STTG: Similar amount of birds as yesterday. There was a bit of rain in the morning so we had to close the nets at mid-morning. The highlights were the first linnets of the season (recaptures), two more chiffchaffs, and a recapture goldcrest ringed elsewhere in Sweden.

Div: FOG and JSA finished working on the new funnel trap and took it to the east side of the cape, on top of the seaweed. We hope to catch pipits with it soon! FMN, who was here last autumn, arrived and will be staying for the whole season as ringing assistant and guide. For dinner we went to Skådarpub with Ölands birdwatching community which was a lot of fun and the food was nice!

Later, JSA and VIV went nightcatching. They trapped and ringed a purple sandpiper.
