STRÄCK:

Udden:

Vitkindad gås 1300, ejder 7500, sjöorre 3200, svärta 26, smålom 3, rödglada 5, storspov 3, kentsk tärna 2, fisktärna 2, tobisgrissla 5, råka 2 (JMS, JSA, FMN, ERD, KWL, Mfl)

RASTARE:

Udden:

Havsörn 2, skärnäppa 100, silltrut 2, vittrut 1 2k, skärpiplärka 3, svart rödstjärt 2 honfärgade, svarthakad buskskvätta 1, svartkråka 1 (JMS, JSA, FMN, ERD, KWL, Mfl)

Västrevet:

Havsörn 2 (ERD)

Norrvik:

Skärfläcka 70 (JSA, KWL)

Mellersta lunden:

Duvhök 1, dubbeltrast 1 (JSA)

Ås:

Ormvråk 4 (UTE)

Hingsthagen:

Tobisgrissla 2 (UTE)

Fyrvägen:

Större strandpipare 39, brushane 4, roskarl 2, skärpiplärka 1, svart rödstjärt 1 hane, stenskvätta 10, sävsparv 1 (JMS, KWL, VIV, HXF, UTE)

Gäddviken:

Sångsvan 1 (JMS)

Kungsgården:

Rödglada 1, gråsiska 2, domherre 4 (UTE)

Vipängen:

Havsörn 1, storspov 2 (UTE)

Norra schäferiängarna:

Storspov 4 (UTE)

Fyrträdgården:

Tornfalk 1, gröngöling 1 (FMN)

Södra schäferiängarna:

Vitkindad gås 300, havsörn 2, skärfläcka 27, kärrsnäppa 25 (ERD, FMN, JMS)

DIVERSE:

STTG: Low-ish number of birds, but the first wagtails of the year for STTG were nice. Some more chiffchaffs also, for which we have started taking feather samples from and photolabbing as many as we can. This is a project to do with the collybita and abietinus subspecies which we would like to revive.

RINGMÄRKNING:

Antal nätmeter timmar: 210

Rapphöna 2

Storskarv 1

Sädesärla 3

Gärdsmyg 2

Rödhake 18

Svart rödstjärt 1

Koltrast 1

Rödvingetrast 1

Gransångare 3

Kungsfågel 3

Talgoxe 1

Bofink 3

Hämpling 1

Totalt 40 individer av 13 arter.

Ringmärkare: ERD, UTE, KWL, ALD, JSA, HXF, VIV, FMN, JMS.

Lördagen den 6 april 2024

OTTENBY FÅGELSTATION

AND: No birds.

Div: FMN had a guiding for 2 people. FMN and ERD went birdwatching in södra lunden and saw a bat flying around in daylight which was cool! ELL, ALD and JMS went up the lighthouse since ELL is leaving tomorrow and hasn't been up there yet. JMS, VIV, KWL and HXF did plover survey and counted 39 ringed plovers along fyrvägen, 5 of which were colour-ringed. MHM and co. found a Glaucous gull on the cape which FMN and JSA were lucky to see. We activated the new funnel trap with white wagtail playback since there have been many in the area. We couldn't manage to trap any wagtails but a linnet found its way inside and marked the first bird ringed using this new trap! In the afternoon JSA noticed a pair of grey partridges in krattet and trapped them. Later in the evening JSA went nightcatching and caught a nice adult cormorant!
