DIVERSE:

STTG: Decent amount of birds, with a handful of highlights! A nice cairii-morph black redstart, 4 redpolls, the first woodpecker of the year (a female great-spotted woodpecker) and 7 chiffchaffs.

AND: nothing caught.

Div: JSA found a chiffchaff in the garden that piqued his interest. He managed to catch it and we had a good look at it in the hand. It had no yellow on the face and overall looked quite good for tristis (siberian chiffchaff) but there was a bit too much yellow in the undertail. Unfortunately it didn't call at any point so we are left unsure. We feather sampled it though so perhaps in the future we will find out! In preparation for ALD going to Stockholm to pick up lure ducks for the ducktrap, ALD and JMS took the station car to pass besiktning in Färjestaden. Later in the evening, JSA and VIV went nightcatching and brought back a purple sandpiper and 3 wheatears! (one of which was a retrap from the other day).
