Grönsiska 1

**Totalt 22 individer av 8 arter.**

Ringmärkare: VIV, HXF, KWL, ERD, FMN, JSA, JVJ, JMS, MHM.

### DIVERSE:

STTG: More birds than yesterday, but still somewhat few. 3 chiffchaffs, a siskin and a black redstart were the highlights.

AND: nothing caught.

Div: Cleaning day and shopping day! On the way to shopping in Kalmar, JMS and ALD dropped off the duck car at the Besikting. They also tried to take one of the trailers but as they were driving it up fyrvägen one of its wheels stopped turning so they had to turn back. FMN had a school guiding for 25 people, and he and ERD also took them up the lighthouse which they were very grateful for. A great-spotted woodpecker was caught in the afternoon and shown to friends of MHM who came for a quick visit. A cool leucistic shoveler was seen in fyrvägen.
