STRÄCK:

Udden:

Svärta 1, smålom 1, storlom 1, havsörn 2, skärfläcka 1, kustlabb 1 ad, kaspisk trut 1 2k, småtärna 2, sillgrissla 1, tordmule 4, trädpiplärka 3, råka 1 (JMS, FMN, MHM, JVJ, HXF, Mfl)

RASTARE:

Udden:

Skärnsnäppa 50, kaspisk trut 1 3k, skräntärna 2, svartkråka 1 (JMS, FMN, MHM, JVJ, HXF, Mfl)

Västrevet:

Havsörn 1 (FMN, SSL, TLN, JSA)

Sandvik:

Kustpipare 3, sandlöpare 2, kärrsnäppa, underarten schinzii 7, myrspov 52, svartsnäppa 1, småtärna 4 (MUN)

Norra lunden:

Gröngöling 1 (JSA)

Sibyllas jaktstuga:

Rödglada 1 (JSA)

Södra lunden:

Morkulla 1 (JMS, ALD)

Fyrvägen:

Skärfläcka 2, gulärta 1 hane (JVJ)

Kungsgården:

Kanadagås 12, ornvårk 1 (JSA, JMS)

Södra lundspetsen:

Göktyta 2 (MHM)

Fyrträdgården:

Buskskvätta 1, svarthakad buskskvätta 1 hona (JSA)

Kungsgärdet:

Rödglada 2 (SSL, TLN)

Södra schäferiängarna:

Kanadagås 2, havsörn 1, rödspov 3 (SSL, TLN, MUN)

RINGMÄRKNING:

Antal nätmeter timmar: 410, andfänget aktivt

Större strandpipare 1

Gärdsmyg 2

Röd hake 11

Rödstjart 1

Taltrast 1

Svarthätta 3

Gransångare 8

Lövsångare 1

Steglits 1

Grönsiska 1

Hämling 2

Totalt 32 individer av 11 arter.

Ringmärkare: JSA, HXF, ALD, JVJ, JMS, FMN.

DIVERSE:

STTG: Some birds today, though not as many as we were hoping for. Highlights were a common redstart, a goldfinch, and mallard in the helgoland trap! It was already ringed by us, and in fact it is quite an interesting recapture: it was ringed last year in the summer wader trapping, then controlled one month later in the ducktrap. This means that it has been in three trapping localities: VADA, AND and now STTG! We looked through all the mallards and this is the only one on record to have 3 localities, and perhaps the only bird in Ottenby in 3 localities? There's not many other species for which this could be the case...

AND: 1 new mallard.

OTTENBY FÅGELSTATION

Div: SSL and TLN arrived for the weekend. Today we went to the southern forest to put up the colour poles in preparation for the breeding passerine monitoring project! They mark quadrants in the forest in which the surveyor will note down the sightings of singing passerines and nesting indications. Madeleine Eidhagen López arrived (MEL, Uppsala) and will be working in Naturum for the rest of the spring. Later in the evening JSA, HXF and JVJ went nightcatching and caught a ringed plover.
