Gök 1

Sädesärta 4

Törnsångare 1

Hämpling 1

Totalt 33 individer av 7 arter.

Ringmärkare: FOG, SSL, KWL, JMS, GFL, AED

DIVERSE:

The first day of Montague's Harrier chick season! Frank, Jaime and Kevin went out with Aron to colour-ring and sample the first bunch of chicks today with plenty more to follow in the coming weeks, with what looks like a record year for the species on Öland. A Cuckoo was also trapped for a guiding, an adult female, and the first few birds were trapped on the ponds with possibly the beginning of this years VADA trapping.
