Inga nät, andfänget aktivt

Bläsand 1

Gräsand 20

Totalt 21 individer av 2 arter.

Ringmärkare: AMN, HDY, LSK.

DIVERSE:

AND: Yet another busy day with 184 ducks to greet us at the trap, the third highest recorded! We had a special highlight today as an adult female Wigeon was in the trapping room already when we arrived, a greatly desired species and age for the photolab.

The day was spent doing conducting a work party. We managed to fully dismantling the A Trap. Besides this we disposed of cardboard duck boxes, entered ringing data and updated diaries. LBO made an famous Brazilian dessert to top off our evening.
